

# Quick and Easy HOME TIPS

---

*Time-saving tips that keep your home  
in great working order*

---

## POWER UP

*Some outlets are controlled by a wall switch.  
Flip on the wall switch to get power to your outlets.  
Stickers will indicate which wall switch and outlet  
work together.*

*Some bathroom outlets are equipped with circuit breakers.  
If you are not getting power, push the reset button on  
the outlet. The reset button may be on an outlet in  
a second bathroom.*

---

### KEEP THE ICE FLOWING

*If the ice maker isn't working, make sure the metal lever on the ice maker is in the down position.*

### DRY CLOTHES FASTER

*To dry clothes fully and efficiently, remove lint from the dryer filter after every use.*

### FOR WATER LEAKS

*All plumbing fixtures are equipped with water shut-off valves.*

*If you suspect you have a leak, turn the valve clockwise to stop the flow of water and call for service right away.*

### PREVENT DISHWASHER LEAKS

*Only use soap that is specified for dishwasher use. Other liquid soaps create too many suds, which can cause water leaks in your kitchen.*
